CHOSEN BY OVER 400
FORTUNE 500
COMPANIES

- OrgPlus Standard is part of the OrgPlus Family of Solutions, which also includes

OrgPlus OnDemand,
OrgPlus Enterprise,
OrgPlus Professional,
OrgPlus Express and
OrgPlus Reader.

OrgPlus Standard is the easiest way to create great-looking organisational charts. Send to OrgPlus OnDemand to collaborate in real-time with your distributed teams. OrgPlus is ideal for organisations that wish to create and distribute standardised organisational charts for planning and communication purposes. No drawing required.

Create Org Charts Fast

No drawing skills are required to create great-looking organisational charts with OrgPlus. You'll never have to manually position or connect the boxes in your chart again. As a result, OrgPlus helps you do all the work in one-third of the time.

Design Charts Effortlessly

OrgPlus allows you to select multiple box layout options such as multi-column and multi-record and select vertical alignment within a box to improve the overall appearance of your org charts. With the Microsoft-style user interface, you can simply add, edit, format and move boxes around. To save time, simply use optimised branch styles to eliminate repetitive steps.

Make Quick Updates

Powerful formatting and charting tools make editing boxes and defining information fields easy. When it's time to edit your charts, OrgPlus instantly repositions all boxes and connecting lines for perfect spacing and centering much faster than using draw or paint programs. Easily compare chart versions by generating an easy-to-read report that summarises the changes.

Create Different Scenarios

Dynamically move employees around your chart to perform interactive "what-if analysis" making planning and decision making much easier. With OrgPlus Standard, you can experiment with different scenarios, knowing you can instantly undo or redo multiple steps.

Now you can create professional-looking org charts quickly and effortlessly. Try it for yourself and see.

Manage Data with Ease

Use enhanced conditional formatting to automatically identify all employees that meet specific criteria such as contract or permanent status. You can also insert links to other files that contain employee related information including budgets, employee resumes, employee bios or performance reviews.

OrgPlus lets you define any box or field as a hotspot. When the user moves the cursor over a hotspot a profile is dynamically displayed.

Collaborate with OrgPlus OnDemand

Send org charts to a secure online environment, provide access to only current charts and enable co-editing and sharing of charts with teams anytime, anywhere – and no additional software downloads or updates required.

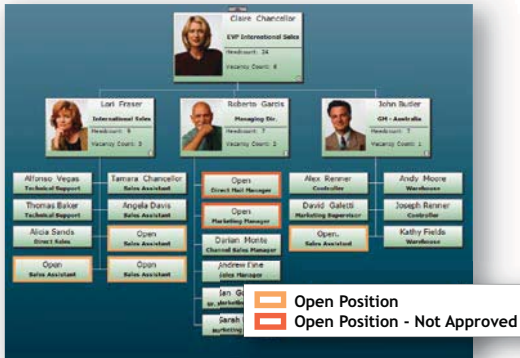

Communicate Information Efficiently

OrgPlus Standard makes it easy to generate phone lists, directories and profiles. You also have the option to show or hide sensitive data to limit who can view it. Additionally, OrgPlus Reader – which is available as a free download – allows org charts to be easily shared throughout your organisation.

Integrates with Microsoft Office

Include charts in all Microsoft Office applications including MS-Word and PowerPoint. You can even create and edit charts from within Microsoft Office applications.

Feature Overview

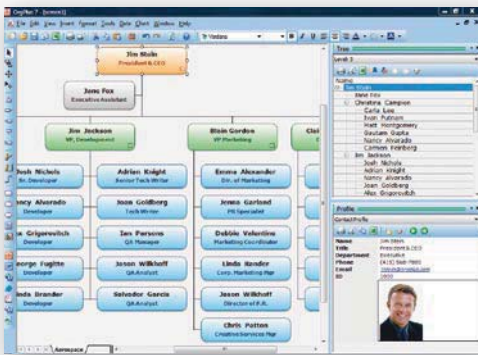

Powerful conditional formatting capabilities make it easy to identify organisational information or employee characteristics.

Chart Creation and Formatting

- Use optimised branch styles to eliminate repetitive steps and improve chart views.
- Enhanced box layout options with multi-records and multi-columns.
- Type names, titles and information into each box – boxes automatically shrink or expand to fit text.
- Add boxes by simply selecting a box tool and clicking on the chart.
- Choose from 36 pre-made chart and box templates.
- Create multiple charts within a single file.
- Define an underlying background page that is common to all sub-charts.
- Include images and pictures in boxes.
- Customise charts with fill effects, including gradients and textures.
- Automatically break large charts into smaller, more manageable sub-charts for refined analysis.

Data Management and Reporting

- Summarise changes between chart versions in an easy-to-read report.
- Create phone lists, salary tables, headcount roll-ups, directories and profiles.
- Perform spreadsheet functions on data in chart boxes, such as roll-up totals, averages, fractions and standard deviation.
- Define criteria to view pre-defined groups at-a-glance.
- Show or hide sensitive data.
- Insert links to other files that contain employee-related information—including budgets, employee resumes, employee bios or performance reviews.
- Search and sort chart data within charts.
- Use Profile Views to show additional information about a box without cluttering your organisational chart.

Dynamic reporting tools allow you to create reports using chart data, test what-if scenarios and visualise potential budget or headcount impact by chart branch.

Planning Tools

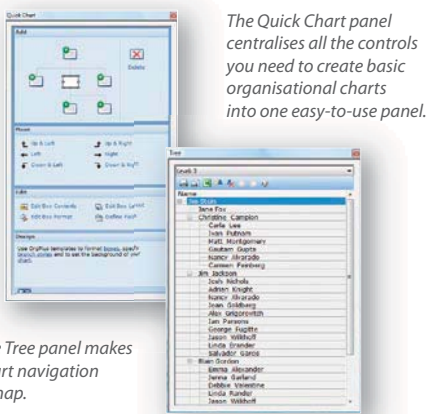

- Easily calculate salaries, headcount roll-ups, averages, fractions of total, standard deviation and more.
- Create budgets from chart data.
- Utilise drag-and-drop calculating and dynamic hierarchical reporting tools.
- Insert comments in OrgPlus charts to clarify organisational changes.

Export Options

- Send to OrgPlus OnDemand to enable real-time collaboration.
- Output web-ready charts in HTML or JPEG format.
- Distribute charts via email from within OrgPlus.
- Print booklets or wall charts.

Microsoft Office Integration

- Create, view and edit OrgPlus-created files from within Microsoft Office.
- Use charts in Microsoft Office applications with object linking and embedding (OLE).
- Export chart or report data to Excel for further analysis.

The Quick Chart panel centralises all the controls you need to create basic organisational charts into one easy-to-use panel.

The Tree panel makes chart navigation a snap.
